## NSW Workforce Development Update: Specialist Supportive Clinical Management (SSCM) Training

The SSCM workshops form part of the important work that InsideOut delivers under the NSW Service Plan for People with Eating Disorders, with the aim to build the capacity of our workforce to provide evidenced based treatments to people with eating disorders and their families.

In 2017, the roll out of Inpatient Management of Eating Disorders commenced. This has continued through 2023 with 387 health professionals from across NSW attending SSCM training workshops.
